

# New @ OSI

## Model 251 Swell Shade Operator

**3450.00** OSI now offers the industries most cost effective solution for Swell Shade operation in both new and existing installations. The single stand alone unit operates large and small swell shades with power, speed, and accuracy. A proprietary design insures whisper quiet operation over a wide range of operating conditions. Infinitely variable travel and ease of installation with common tools makes setup quick and trouble free. The Model 251 will interface with all organ control systems without the need for any special boards.

### Features:
